

Soumik Belel

Data Analyst | Data Scientist

soumikbelel3@gmail.com | +91 62955 27807 | Kolkata, West Bengal
github.com/soumikbelel3-commits | soumikbelel3-commits.github.io/soumik-portfolio

Data-first analyst with a Mathematics and Statistics foundation, turning raw data into decisions end to end — Python, SQL and statistical modelling for the analysis, Power BI and Tableau for the reporting, and Cloud, TypeScript and MLOps for shipping it into production. Two analytics internships and 25+ projects across finance, banking, retail and operations, including a 5.8M-row flight performance pipeline and a live trading terminal.

EDUCATION

B.Sc. in Mathematics & Statistics Graduated Aug 2022
Serampore College, University of Calcutta · Kolkata, West Bengal

CERTIFICATIONS

Google Data Analytics (Google) · Google Advanced Data Analytics (Google) · Data Analytics (DeepLearning.AI) · IBM Business Analyst (IBM) · AWS Cloud Solutions Architect (Amazon Web Services) · Generative AI Data Analyst (Vanderbilt University)

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, TypeScript
Python / Data: Pandas, NumPy, scikit-learn, SciPy, statsmodels, SQLAlchemy, Matplotlib, Seaborn, Plotly
Databases: SQL, BigQuery, Cloud SQL (GCP), Redis
Backend / Web: FastAPI, REST APIs, React, Vite, Tailwind CSS, HTML5 & CSS3, Git / GitHub
BI & Tools: Power BI (Power Query, DAX), Tableau, Excel (Power Query, Pivot Tables), Streamlit
Languages: English, Bengali, Hindi

EXPERIENCE

Labmentix (Internship · Virtual) Mar 2026 – Sep 2026
Data Analytics Intern

- Clean, model and visualise raw datasets with Pandas and SQL, standardising them for downstream reporting.
- Deliver insights through Power BI reports and Python-generated analysis for stakeholder review.

Unified Mentor (Internship · Virtual) Feb 2026 – July 2026
Data Analytics Intern

- Perform end-to-end exploratory data analysis on real-world datasets, from ingestion and cleaning through to the final findings.
- Build interactive dashboards that turn the analysis into self-serve views for non-technical users.

PROJECTS

Omni Terminal — Financial Intelligence Platform | *React · TypeScript · Supabase · Vercel · Redis · TimescaleDB*
Full-stack web terminal for Indian retail traders — real-time market charts, stock screeners and an analytics dashboard, built and deployed end to end.
Live: omni-terminal-nu.vercel.app

U.S. Airline Performance & Delay Analysis | *Python · SQL (SQLite) · Pandas · Streamlit · Plotly*
Ingested 5.8M domestic flights into SQL and modelled pre-aggregated OLAP tables, cutting dashboard queries from 28s to under 10ms, then surfaced delay and cancellation drivers by carrier, airport and hour.

European Bank Churn Prediction | *Python · scikit-learn · XGBoost · SHAP · Streamlit*
Benchmarked five classifiers on 10K retail-bank customers; shipped the Gradient Boosting champion (86% accuracy, 0.86 ROC-AUC) behind a SHAP-explained risk calculator and retention simulator.

Trader Behavior & Performance Analysis | *Python · SQL · Power BI*
Analysed trader-level activity to segment performance and surface the behavioural patterns behind winning and losing accounts.

Global Supply Chain Risk Analysis | *Python · SQL · Power BI*
Modelled supplier, route and region-level risk across a global supply chain and shipped the findings as a drill-down Power BI dashboard.

Financial Performance Analysis & Dashboard | *Python · Excel · Power BI*
Built a reporting layer over company financials covering revenue, margin and cost trends, with DAX measures driving the dashboard views.

HR Analytics — Employee Attrition | *Python · scikit-learn · Power BI*
Investigated the drivers of employee attrition and presented at-risk segments to support retention decisions.

AI Resume Analyzer | *Next.js · TypeScript · Prisma · Gemini API*
ATS scoring and job-match engine that parses a resume against a job description and returns an AI-generated review with section-level fixes.
